- A. Land used for only one purpose
- B. Land used for multiple purposes (e.g., residential + commercial)
- C. Unused land

D. Agricultural land only

Your answer: _____

9. Which land use type supports biodiversity the most?

A. Industrial

B. Commercial

C. Conservation

D. Residential

Your answer: _____

10. Proper classification of land use helps to:

A. Improve planning and land management decisions

B. Increase land conflicts

C. Reduce productivity

D. Ignore environmental concerns

Your answer: _____

Part 2. True / False

11. Agricultural land includes crop production and livestock farming.

Answer: _____

12. Residential land is used for business activities only.

Answer: _____

13. Industrial land use includes factories and production facilities.

Answer: _____

14. Conservation land is important for protecting natural ecosystems.

Answer: _____

15. Land use classification is unnecessary in land management.

Answer: _____

Part 3. Short Answer Questions

16. Define land use classification and explain its importance.

17. List and describe four main types of land use.

18. What is mixed land use, and why is it important in urban planning?

19. Explain how incorrect land use classification can affect land management.

20. How does land use classification support sustainable development?

Part 4. Practical Activity

Task: Classify the Land Use

Below are examples of land parcels. Identify and classify their land use type.

Land Parcel Description

Land Use Type

A large field used for growing wheat

- | | |
|---|-------|
| A city area with houses and apartments | _____ |
| A factory producing textiles | _____ |
| A national park with wildlife protection | _____ |
| A shopping center with offices and stores | _____ |
| A playground and public park | _____ |
| A highway connecting two cities | _____ |

Part 5. Discussion Questions

21. Discuss how land use classification helps in urban and regional planning.

22. Analyze the impact of urban expansion on agricultural and conservation land.

23. Evaluate the importance of balanced land use planning for sustainable development.
