CIRCULAR ECONOMY FOR LAND AND WASTE MANAGEMENT

1.- Introduction to Circular Economy in Land and Waste Systems

Activity 2

Mini-quiz (5 MCQs): Linear vs circular economy characteristics.

Co-funded by
the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

Mini-Quiz: Linear vs Circular Economy Characteristics

Question 1

Which statement best describes the linear economy model?

- A. Materials circulate continuously through reuse and recycling.
- B. Resources are extracted, used to produce goods, and then discarded as waste.
- C. Products are designed to be easily repaired and reused.
- D. Biological materials are returned safely to natural systems.

Question 2

What is the main goal of a circular economy?

- A. Increase production and consumption.
- B. Maximize resource extraction.
- C. Keep materials and products in use for as long as possible.
- D. Replace all natural resources with synthetic materials.

Question 3

Which strategy is commonly used in a circular economy?

- A. Landfilling waste
- B. Incinerating products after use
- C. Repairing and reusing products
- D. Increasing raw material extraction

Question 4

In a circular economy, waste is often considered:

- A. An unavoidable result of production
- B. A valuable resource that can be reused or recycled
- C. A necessary part of economic growth
- D. Impossible to reduce

Question 5

Which of the following practices supports circular material flows?

- A. Short product lifetimes
- B. Planned obsolescence
- C. Recycling and remanufacturing
- D. Single-use products
